

# **TRAIN WHERE THE REAL GUYS DO**

Introducing COVERT OPS – SD  
An incredible adventure in California

Spend a day or more at the same incredible facility used to prepare more than 700,000 troops for deployment. Practice military tactics under the direction of US Navy SEAL veterans.

Brave the shoot house. Fast Rope into action. Storm the hospital. Stage an extraction. Shoot and be shot at.

**The training is Real.** The mission is fun.

The skills could save a life.

800-644-7382

# Action On The Set

In 1992, legendary television producer Stu Segall brought the long-running series “Silk Stalkings” to San Diego, creating the first and only full-service production studio in the city.

A decade later, he forever changed the face of tactical training by launching a new division of Stu Segall Productions, dedicated to providing hyper-realistic training to law enforcement, military and homeland defense organizations. The “magic of Hollywood” is utilized to create intensely realistic training scenarios.

For one incredible day, you can train under the command of veteran US Navy SEALs at this very special place.
